

How To Adjust Governor On

A governor is a device within an engine that allows it to consistently run at its optimum power. The governor adjusts to changes in terrain, responding by opening or closing the throttle to allow for more or less engine power.

How to Adjust a Briggs & Stratton Governor | Hunker

Tecumseh engines are equipped with a governor. If the engine over-revs, the governor will cut back the throttle. Conversely, if the engine is under a heavy load, the governor will increase the throttle to compensate. To adjust the governor on a Tecumseh engine, you'll need only basic hand tools.

How to Adjust the Governor on My Tecumseh Engine | Hunker

Move the spring upwards one hole towards the governor lever pivot point. Start the engine. If the engine remains throttling to low, shut off the engine and adjust the spring upward one more hole.
