Recently, vehicle composition in Indonesia was changing drastically. Worsening congestion, forced some travellers from all income levels to choose motorcycle and therefore motorcycle percentage in vehicle composition became higher than default values in Indonesian Highway Capacity Manual (IHCM) 1997 as found in Jakarta, Bandung, Surabaya and ...

Vehicle Composition and Lane Distribution in Multilane ...

Abstract. According to the fact that there is no renewing of Indonesia Highway Capacity Manual (IHCM) for over 17 years, while in the same way, traffic characteristics has significantly changed, leads the research to know the mismatch of the traffic performance prediction by IHCM.

Renewing of Indonesia Highway Capacity Manual Urbanroad ...

Abstract—Recently, the 1997 Indonesian Highway Capacity Manual is commonly used to analyze the performance of road and intersection. However, since the motorized vehicle grows rapidly and significant change of driver behavior, several parameters must be validated so that the calculation result could represent the actual condition. This paper aims to improve the Indonesian HCM formula ...

Worsening congestion, forced some travellers from all income levels to choose motorcycle and therefore motorcycle percentage in vehicle composition became higher than default values in Indonesian Highway Capacity Manual (IHCM) 1997 as found in Jakarta, Bandung, Surabaya and Mataram. In IHCM (1997) default values, the larger the city, the lower the motorcycle percentage in traffic. Recently ...

Vehicle Composition and Lane Distribution in Multilane ...

Indonesia is based on Indonesian Highway Capacity Manual (IHCM) 1997. The available traffic analysis software based on IHCM (1997) is called KAJI. However, KAJI was developed using DOS as the operating system and has some weakness. The graphical presentation of KAJI is quite basic, i.e. picture using ASCII code. There are also some problems if KAJI is running on Windows operating system ...

Speed and Capacity for Urban Roads, Indonesian Experience

The main hypothesis behind the project of developing Indonesia Highway capacity manual (IHCM), is Indonesian traffic characteristics are basically dif-ferent from those of developed countries. Existing capacity manuals from such countries therefore cannot be successfully implemented in Indonesia. The aim of the research behind the production of IHCM manual has been to explore and model ...
