"It is an important and popular fact that things are not always as what they seem. For instance, on the planet earth, man has always assumed that he was more intelligent than dolphins because he had achieved so much: the wheel, New York, wars.

mathematical quotes - San Francisco State University

An irrational number is a number that cannot be expressed as a fraction p/q for any integers p and q . Irrational numbers have decimal expansions that neither terminate nor become periodic. Every transcendental number is irrational. There is no standard notation for the set of irrational numbers, but the notations \mathbb{Q}^c , $\mathbb{R} \setminus \mathbb{Q}$, or $\mathbb{R} \setminus \mathbb{Q}$, where the bar ...

xkcd: Interesting Life

Math students are often asked to give their answer in "simplest terms"—in other words, to write answers as elegantly as possible. Though a long, ungainly expression and a short, elegant one may technically equal the same thing, often, a math problem isn't considered "done" until the answer has been reduced to simplest terms.

How to Simplify Math Expressions: 13 Steps (with Pictures)

Increase student performance and retention with individualized assessment and learning. Take control of your classroom, and save time with ALEKS' powerful learning management system.
